The Honorable Julius Genachowski, Chairman  
Federal Communications Commission  
445 12th Street, SW  
Washington, DC 20554

Re: DA 12-1863, IB Docket No. 12-340; RM-11683

Dear Chairman Genachowski:

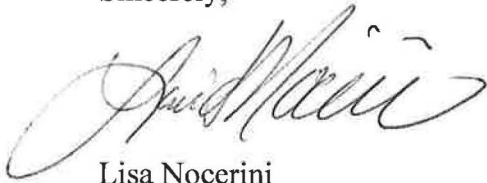

Thank you and the FCC for considering LightSquared's License Modification Application. I work with many communities throughout Michigan, some in rural areas, and in order for them to be successful; they need to have the same technology offered in urban areas. I know that the FCC is committed to improving service as well as increasing competition with companies involved with the mobile broadband network.

I especially like the aspect of trying to increase the level of competition. Overtime it appears that the market is shrinking with fewer companies available to choose from for service. At the same time demand for the network has increased. For the sake of the consumer and for our economy overall this is a bad formula. More competition is best for all involved, especially the consumer.

LightSquared offers the FCC the opportunity to help increase competition and, with the increase in usage by the public, it should not hurt the other existing companies. LightSquared has presented a sound plan that the FCC should support. We need the jobs and the increased competition that should lead to lower costs for the consumer.

Thank you and the rest of the FCC for their attention to this important issue.

Sincerely,

A handwritten signature in cursive script, appearing to read "Lisa Nocerini", written in dark ink.
